

I feel that since everybody pays for there own units plus services that you should leave us alone. We like the way things are right now. It is not fair to want to shut things all down because the radio stations are crying the blues because we do not want to listen to there lame radio. Someone was smart enough to come up with this idea and make it work. It worked so well you want to take it away. That doesn't make sense nor does it seem fair to all of us customers. I would like to be kept posted on the whole situation. thank you
